

Proposals

PROPOSAL 1:

Creation of an Open-air Gymnasium on Campus with Improved Equipment

I am excited to propose the creation of an open-air gymnasium on campus, which will offer students and faculty members an opportunity to improve their physical fitness and wellbeing. Our gymnasium will include a range of exercise equipment, including:

Standing Twister

Air Walker

Sit Up Board

Horizontal Bars Outdoor Gym

Leg Press/Exercising Bars

Pull Chair Machine

The open-air gymnasium will provide an opportunity for the campus community to engage in outdoor physical activity, which is beneficial for both physical and mental health. By providing access to a range of exercise equipment, I aim to encourage individuals to engage in a diverse range of workouts that target different muscle groups and improve overall fitness.

I propose to set up the gymnasium on an open field on campus and provide the necessary equipment for users. I believe that the gymnasium will be a valuable addition to the campus community and will promote a healthy lifestyle.

I look forward to hearing your thoughts on this proposal and to working together to create a healthier campus community.

PROPOSAL 2:

Introduction of Archery as a Sport on Campus

I am excited to propose the introduction of archery as a new sport on campus, which will provide students and faculty members with an opportunity to learn and compete in this exciting and challenging sport.

Archery is a sport that requires concentration, focus, and physical dexterity. It is an inclusive sport that can be enjoyed by individuals of all ages and abilities. By introducing archery on campus, I hope to create an opportunity for the campus community to engage in a new and exciting sport and to promote physical fitness, mental health, and overall wellbeing.

Our proposal involves providing students and faculty members with exposure to archery through introductory classes and workshops. I will work with experienced archery coaches to provide students with the necessary instruction and training to learn the fundamentals of the sport.

PROPOSAL 3:

Conduction of Triathlon

I propose the conduction of a triathlon event for the students of our institute. The event is aimed at promoting and encouraging students to participate in multiple sports at once. Our institute recognizes the importance of physical activity and aims to provide opportunities for students to engage in a variety of sports activities.

The primary objective of the triathlon event is to promote physical activity and healthy living among students. The event aims to encourage students to participate in multiple sports activities simultaneously, which will not only provide a more comprehensive physical workout but also promote team building and sportsmanship.

Event Details:

The triathlon event will consist of three components - swimming, cycling, and running. Participants will be required to complete each component in sequence, with the total time taken to complete all three components being used to determine the winner. The event will be open to all students of the institute, and participants will be grouped by age and gender.

I believe that the triathlon event will be a great opportunity for students to showcase their physical prowess and promote healthy living. I am confident that the event will be a success and look forward to the participation of all students.
