SISTER NIVEDITA HALL OF RESIDENCE

Contesting for the post of
General Secretary Students' Welfare
Technology Students' Gymkhana
Indian Institute of Technology Kharagpur (2023-24)

1.BUILDING A WEBSITE FOR OFF-CAMPUS INTERNSHIP PROGRAMS AND MATERIALS FOR SKILL DEVELOPMENT.

Idea:

- Building a website for off-campus internship programs and materials for skill development is important for accessibility, information gathering, efficiency, and skill development.

Why is it needed?

- **Accessibility:** A website allows students to access information about internships and skill development programs from anywhere at any time..
- **Efficiency:** A website streamlines the application process by allowing digital submission of applications and resumes, saving time and resources for students.
- **Skill development:** A website provides students with access to various skill-building resources such as online courses, tutorials, and other learning materials for their desired internship or future career.

Implementation:

- Building a website which shows a proper listing of the off-campus opportunities available for the students with proper details mentioned.
- Making required resources for different profiles available from previous students for internship preparations available for students.
- Helping students by making road-maps for different profiles available especially for them for their internship preparation.

2. PUBLIC WASHROOMS : CONSTRUCTION AND MAINTENANCE

Idea :

- Installation of new public washrooms and maintenance of existing washrooms in public areas

Why is it needed?:

- Most frequented roads especially 2.2 do not have accessible public washrooms which is a bare minimum human necessity. It is inconvenient for students to have to go to hall of residence each time they need to use a washroom especially for female students as there are fewer female halls of residence
- The existing public washrooms are very poorly maintained and are potential health hazards due to poor sanitation

Implementation:

- Construction of Gender-Neutral Washrooms in the locations of Technology Market and the Route to Vikram Sarabhai Residential Complex.
- The newly installed washrooms are thoroughly tested for safety and accessibility standards.
- Ongoing maintenance is required to ensure that the washrooms remain clean, functional, and safe for use. This may involve routine cleaning, restocking of supplies, repairs, and upgrades as needed.

3. B.C.ROY TECHNOLOGY HOSPITAL : IMPROVING THE FACILITIES

Idea :

- Improve the facilities at B.C.ROY Technology Hospital. This will enhance the quality of care and improve the overall patient experience.

Why is it needed?:

- Many students felt that the facilities at B.C.ROY Technology Hospital are to be improved like Sanitization facilities, washroom facilities, availability of specific doctors at times.
- Students also expect a comfortable and convenient experience during their hospital stay. Improving the facilities at B.C.ROY Technology Hospital can help meet these expectations and provide better patient outcomes.

Implementation:

- Proper sanitation facilities and their maintenance are crucial for ensuring good health and hygiene practices. This includes access to clean water, toilets, and handwashing stations that are regularly cleaned to prevent the spread of diseases
- Installation and maintenance of the sanitary pad disposal machines at the necessary places
- Improving the quality of food that is available for the students who are admitted in B.C.ROY Technology Hospital.
